

Well prepared for the heat of the moment

INCIDENT COMMAND SYSTEM TRAINING ICS 300

Description

The Incident Command System is used to coordinate all command and control functions to resolve incidents of all sizes or major events. It is necessary to provide focus and interoperability to all agencies and their personnel who are called upon in the event of an incident or complex event.

Target group

Personnel who have a role within the Incident Command system and/or who have to command multiple resource units during expanding phases of incidents. Supervisory roles such as Fire Brigade Commanders or operational management function.

Pre-requisites

Delegate has undertaken an ICS 200 course.

Training program

Course objectives

On concluding the training the participants will be able to:

- Describe Unified Command
- Describe the process for Incident assessment and establishing incident objectives and tools used to carry out the assessment
- Identify the importance of Planning process and the steps involved
- Describe how to prepare Incident Action Plan (verbal / written)
- Identify and describe the basic principles for Incident resource Management and key considerations
- Describe the importance of Demobilising Planning, transfer of command and closing out.

Each participant will receive an individual performance assessment based on the competency requirements for the role.
