

Well prepared for the  
**heat** of the moment

**HAZMAT  
TECHNICIAN**

#### Target group

This course is intended for personnel who have already conducted an Operator level training and are expected to provide a comprehensive intervention as a Hazardous Material technician as detailed in NFPA 472. Situations that are not predetermined require extra expertise, in order to analyse and apply the correct solutions within the capability of the emergency response organisation.

#### Pre-requisites

- Hazardous Material Operator training

#### Training program

This course is designed for individuals who are expected to respond to incidents involving hazardous materials. Their primary role is to analyse problems involving hazardous materials, and to select the most appropriate method of mitigating and controlling a release of a hazardous material using specialized protective clothing and equipment. Instructional methods include class activities and table top and practical exercises.

#### Subjects Include

- Understanding of relevant standard operating procedures and termination procedures
- Classification, identification and verification of known and unknown materials by using field survey instruments and equipment
- Selection of specialized chemical personal protective equipment (PPE) provided for the hazmat technician
- Hazard and risk assessment techniques
- Basic chemical and toxicological terminology and behaviour

This training is according to NFPA standard 472.

#### Duration

5 days

#### Dates

t.b.d.

#### Training Location

RelyOn Nutec Fire Academy  
Beerweg 71  
3199 LM Maasvlakte-Rotterdam  
The Netherlands
