

# LI-ION SAFETY COURSE

Li-ion

Well **prepared for the heat** of the moment

### Li-ion safety course

There has been a huge increase in the application and scale of Li-ion batteries, which brings new insights and risks. There is a great deal of unfamiliarity about these risks and possible incidents with Li-ion batteries among emergency workers, manufacturers and transporters. How should you handle the storage and transport of these batteries, what measures should you take in the event of damage, how can you prevent incidents and which repressive measures and extinguishers are the most effective?

RelyOn Nutec, together with the experts from EnerSafe, offers the Li-ion safety course. Once you have participated in this course you will be more aware of the risks and know what preventive measures you can take to prevent incidents. We also inform you about the repressive measures you can take to be able to act adequately in the event of incidents.

#### CONTENT

The course is a combination of theoretical sessions and practical demonstrations to broaden your knowledge about the risks of Li-ion batteries. The following topics are covered during the course:

- Knowledge and insight into the risks of Li-ion batteries
- Insight into current standards and developments
- Knowledge and experience of current and conceptual extinguishers
- Lessons learned recent incidents

#### Target groups

- Transport & logistics sector
- Manufacturing companies
- HSE officers
- Emergency workers
- Security officers

#### About EnerSafe

EnerSafe offers training methods and procedures for various sectors and professional emergency workers that focus on the safety of Li-ion batteries. The services mainly focus on providing advice on the use, transport and storage of batteries, preventive measures and the prevention of incidents with Li-ion batteries. EnerSafe also specialises in batteries and energy storage in alternative powered vehicles, such as electric and hybrid vehicles.

#### About RelyOn Nutec

RelyOn Nutec is an international organisation specialised in the safety of people and organisations. We offer consultancy, education and training to professionals from the offshore, maritime and wind energy sector and industrial and public firefighters. Together with our customers, we have been ensuring the safety of employees and organisations for over 35 years. We ensure that our customers are competent and well prepared for emergency situations and our extensive knowledge and experience means that we are able to go beyond the requirements of existing laws and regulations.

RelyOn Nutec has 37 training centres spread over 21 countries worldwide.

#### Duration

1 day

#### Training location

The location is the RelyOn Nutec Rotterdam training centre where we will show you what happens in case of a Li-ion batteries fire and have live demonstrations with current and conceptual extinguishing agents.

#### Price and dates

€ 565,00 per person (excl. VAT)

Group bookings on request via [booking@nl.relyonnutec.com](mailto:booking@nl.relyonnutec.com).

A reference book is included with the course. This contains useful information about, among other things, the characteristics and risks of Li-ion batteries.
