

Well **prepared for the heat** of the moment

**HAZMAT  
OPERATOR**

### Target group

This course is intended for personnel who have already a basic working knowledge of breathing apparatus and are expected to provide a limited intervention as a Hazardous Material operator as detailed in NFPA 472.

### Pre-requisites

Attendance on this training program is open to delegates who have completed a basic breathing apparatus wearers training and have completed a hazardous material awareness training.

### Training program

This course provides the participants with the knowledge and abilities to respond safely at the initial stages of a hazardous material release and to mitigate the effect of the release in the view to protect life, property and or the environment. Instructional methods include class activities and table top and practical exercises.

### Subjects Include

- Analyse the incident by surveying, collecting hazard / response information.
- Predict the likely behaviour of the hazardous material and estimate the potential harm caused by that material
- Plan an initial response for an incident, taking into account the capabilities of the emergency response organisation.
- Implement the initial plan, controlling the response including an emergency decontamination procedure
- Evaluate the actions against the objectives set in the initial plan

This training is according to NFPA standard 472.

### Duration

5 days

### Dates

t.b.d.

### Training Location

RelyOn Nutec Fire Academy  
Beerweg 71  
3199 LM Maasvlakte-Rotterdam  
The Netherlands

## ADVANTAGES OF RELYON NUTEC FIRE ACADEMY
